Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a keyboard support device using in a keyboard, classified in Class 400, subclass 691.
- II. Claims 16-20, drawn to a key switch device using a control device on in a keyboard, classified in Class 400, subclass 472.
- III. Claims 21-24, drawn to a keyboard structure and housing made of particular material, classified in Class 400, subclass 694.

Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Groups I and II is not used together since keyboard's foot of Group I cannot be used in a volume control dial of Group II since they have different modes of operation, different functions, or different effects.

Inventions of Groups I or II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the at least keyboard foot (Group I), or the volume control dial (Group II) does not need an opaque

keyboard frame and the translucent top case (Group III) to be operative. The subcombination has separate utility such a translucent top case can be used in a keyboard without the keyboard foot, or the volume control dial in Groups II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
